

Micael Eriksson, Solution Architect & Technical Expert

Summary

I have many times going through business processes like RFI, RFP, LOI, Business Agreements, Due Diligence, Service Transition & Delivery, Business Cases, Financial Qualification Calculation work to prepare IT Business Agreements that in many cases also includes SLA, SLO, SOW, OLA, etcetera.

My own engagements today are mainly to be a supplier of Solution Architect services and services for Transformation Management, Transition Management, Engagement Management, Project leadership, including ITIL process knowledge within the IT area for Windows, Linux, IBM Mainframe, IBM i, IBM p, IBM x systems and SAP HANA.

I am also Technical Expert mainly for IBM i, formerly known as IBM AS/400, IBM eServer iSeries & IBM i5 including IBM SAN storage, IBM SAN tape and IBM SAN Switches. Within many of my own skills are IBM Websphere programming and design including IBM MQ, IBM Websphere Application Server/ Portal Server/ Development Studio and is also doing a lot of Windows implementations of mainly IBM WebSphere products like IBM WebSphere MQ and so on in the business area that is IBM I and finally SAP HANA.

During my 30+ years within IT business I have done so many different kinds of jobs and have delivered so many different kinds of services and solutions to so many customers so it's worthless to show them in chronological order. Instead I show them sorted by three (3) task types with a work description and together with some of the customers there I have delivered the services. The three (3) task types are presented on the following pages and they are:

Solutions Architect and Project Leadership or Shared Project Leadership and similar roles
Technical Expert

Programing, System Programming and testing of applications including IBM Webshere MQ a.k.a. IBM MQ, IBM Webshere Application Server and other systems integration software's

Since 2003 until today I am running my own Consultancy Company, WE Solutions & Informations AB, and I am also acting as a Sales Agent and supervisor for other Consultants/Subcontractors. I was between 1983 – 2003 employee of WM-data AB and Connecta AB and was there supplying around 150+ customers at that time with similar consultant services like the consultant services I am delivering today.

Mission History - sorted by task type

Solutions Architect and Project Leadership or Shared Project Leadership and similar roles

This Millennium

Customers:, ESAB, Steria BitsData, HP, IKEA, Electa, IL Recycling AB, Resurs Bank, AB Gustav Kähr, Vetsource Inc, USA and many more.
See "Customer List" at end of this document

Work description:

I have been working the last 5 years with the customers mention above but I have more than 25 year work experiences as Solutions Architect or Project Leader and often as Project Technical Leader for a big number of my customers where I have developed solutions for my customers who had been both suppliers and providers customers, i.e. both buying and selling side in outsourcing deals creating IT solutions.

Consultant Profile – Micael Eriksson

As I mentioned in the previous summary there has also been done many years of handling IT Business Proposals, Agreements and Contracts from early stages until final completion.

Technical environment / role / tools:

Handling of customers operating environments with all the aspects available which can be automation, availability, response times, backups, open times etc. connected to the monitoring of such systems from Tivoli or HP Openview. Mainly I am working with solutions based on IBM hardware with focus on larger IBM Mainframe systems and IBM i (formerly IBM AS/400), IBM software and OEM software (OEM = "Original Equipment Manufacturer"). Integrations with other peripheral systems and external links to other external suppliers like UC, SPAR, Property Data, VTR (VTR= Swedish Transport Agency - The Traffic and Driving Licence Registry). I have also been involved in many Windows and Linux environments for setup and usage.

Technical Expert

This Millennium

Customers: ESAB, Steria, BitsData, HP, IKEA, Electa, IL Recycling AB, AB Gustav Kähr, Resurs Bank, Vetsource Inc, USA and many more.
See "Customer List" at end of this document

Work description:

For these customers mentioned above (been in this IT-area for more than 30+ years) I have during the 5 last years worked with the following tasks:

Strategic advisor

Designing and implementing of SAN technologies like PPRC, Metro Mirror, Global Mirror, Flash Copy, XSM, iCluster (Data Mirror), HASM (Copy Services) using mainly IBM V.7000 or IBM V.3700

IBM High Availability Solutions (IBM PowerHA and IBM HAS)

IBM BRMS

IBM PowerVM/VIOS and virtualization

Speaker at events like Data-3 in Sweden

Technical issues like migration, hardware and software including updates of hardware and software

Security

Communications programming and system programming

Implementing IBM Hardware and IBM Software and handling of surrounding questions/issues

IBM iSeries & IBM AS/400 Sales & Marketing

Sales support team leader IBM iSeries & IBM AS/400

Setup of communications environments like Switches, Routers, WAN, LAN

IBM Websphere Application Server

IBM Websphere Portal Server

IBM Websphere Development Studio

IBM Websphere MQ

Lotus Notes & Domino server

IBM Rational Development

Handling of customers' operating environments with all the aspects available which can be automation, availability, response times, backups, open times, security, communication etc. connected to the monitoring of such from Nagios, PRTG, Tivoli or HP Openview.

Mainly I have through the years been working with solutions based on IBM hardware with a focus on the larger IBM systems such as IBM i (formerly IBM AS/400), IBM software and OEM software (OEM = "Original Equipment Manufacturer"). I have also been involved through the years in many Windows and Linux environments according to setup and usage.

Programing, System Programming and testing of applications including IBM Websphere MQ a.k.a. IBM MQ, IBM Websphere Application Server and other systems integration software's

This Millennium

Customers: HP, IKEA, Folksam, Autoliv; Kährs, Folksam, Sandvik AB and EDB/Møller, Norway, Vetsource Inc, USA, 10+ different UK banks and medical businesses and many more.

See "Customer List" at end of this document

Work description:

IBM i Development have been done for these customers the last 5 years, but I started to do this in 1983. I have done all kinds of programming, integration, implementations, testing and so on within this area for all these customers. Last years (2007-2013) major work has been integrating Folksam group of companies, a major Swedish Insurance company and their suppliers mainly through IBM Websphere MQ solutions. Work also includes Basel-II implementations and computer and application security. Lately I have built integration for PDF generation to insurance end customers web browser through a Swedish Internet Bank login and through a IBM i System with PDF generation. The solution also fulfils all regulations around PUL (PersonUppgiftsLagen = Privacy Protection Law).

EDB/Møller, Norway, during spring 2010 working with IBM Websphere MQ, HP and Windows servers design/installation/configuration and production start.

For these customers I have been working as a technical consultant during installation- and implementation periods.

Today I am spending 25-50% of time within this area.

Skills, techniques & methods

Methodology: ITIL, WM-data Quattro, Scrum ...
